

*GY-HM700/710/750/790: We are considering purchasing an HM700 or HM100 or both. Can you tell me the minimum system requirements (# of cores, processor speed, etc) for being able to work with the native Quicktime files? We will be running Final Cut Studio 2 on a Mac Tower. Thanks!*

Any Intel-based Mac Pro (Tower) with 2-4GB of RAM should be OK. Separate HDD for video files is not required, but may be a good option to consider.
