

*GY-HM700/710/750/790: I use the KA-MR100 SxS memory card recorder with my JVC camera. I've seen advertised an adapter that lets you use SDHC cards in the SxS slot. Will this work with my camera?*

No. The SDHC to Express Data (or SxS) adapters that you describe internally convert the SDHC card to a USB signal recognized by many computers through the Express Data card slot. They will not work with the KA-MR100 because we do not support the USB signal.
