

## *Combo Decks: How are the SR-DVM600U and SR-DVM700U different?*

The primary differences are:

- SR-DVM700 has larger hard disk (250GB vs. 40GB)
- SR-DVM700 has the ability to record native DV to the hard disk (allowing you to clone a DV tape by using the HDD as intermediate storage)
- RS-232 control interface
