

GY-HM150/100: Is my GY-HM series camera compatible with the SanDisk Extreme® Pro™ SDHC™ UHS-I memory cards

Yes, the GY-HM series cameras may be used with the new UHS Speed Class 1 SDHC memory cards such as the SanDisk Extreme® Pro™ SDHC™ UHS-I. These cards are similar to Class 10 SDHC cards but have a higher data throughput rating. This can be especially beneficial when transferring files to your computer, as they can support data rates of up to 360 megabits per second.
