

*IP Security Products: Can we connect 24VAC power supply to a JVC VN-C655U camera instead of 18VDC? Is it compatible?*

The VNC655U uses 18 volts DC (1.4 amps). 24 volts AC cannot be directly connected to the camera.

The camera was sold with an included 24VAC to 18VDC convertor. (JVC Part #QAL0684-001) Please use this convertor or supply 18VDC 1.4 amps to the camera.
