

## *GY-HM200/250/170/180 4KCAM: How does the image quality of GY-LS300 compare to the GY-HM200 and GY-HM170?*

The GY-LS300 features Super 35 size sensor which is substantially bigger than 1/2-inch sensors of GY-HM170/200. Larger pixels result in better sensitivity and wider dynamic range while resolution is identical.

The GY-LS300 will perform better in low light and under mixed light conditions.
