

GY-HM200/250/170/180 4KCAM: Can you record the 4K/UHD out to an external device via HDMI, or just view it?

You can record the 4K uncompressed signal output from the HDMI 1.4 connection of the GY-LS300CHU.

An example of a device that can do this is the Atomos Shogun.

Unique solution ID: #1361
