

GY-HC500/550: Can you explain the HDR and log gamma features of the GY-HC500/550 series?

The HC500 series is equipped with HDR and log gamma for high dynamic range and wide color gamut. Hybrid Log-Gamma (HLG) conforms to ITU-BT2100 and our in-house J-Log1 Gamma with 800% dynamic range provide highly capable HDR recordings. Furthermore, the camera's 10-bit recording capability ensures capture of this extended range.
