

## *IP Security Products: Can a VN-C20U be used with the VN-S400U software?*

No, VN-S400U does not support VN-C20U cameras. Currently, there are no plans to update the software. You can use the new software VN-RS800U if you do not need to record more than 8 cameras at the time. This software is free of charge from JVC site. Please use this link:
